A novel *Coriobacteriaceae* bacterium (strain 68-1-3) was isolated from the distal ileum of the swine intestinal tract using a selective mucus-based medium. Here we present the finished genome sequence for the swine commensal, totaling 1.97 Mb in size.

**ACKNOWLEDGMENTS**

Genome sequencing was performed at the National Animal Disease Center, Ames, IA and at the Iowa State University DNA facility, Ames IA.

We thank Sam Humphrey, Lea Ann Hobbs, and Julian Trachsel for scientific and technical support.
